

MANUEL GARCIA MUANZA FERNANDO

Full-Stack Developer | Computer Engineering Student

23 years old • Single • (+244) 931 441 110 • eminenciaemanuel4@gmail.com
/eminenciawebdeveloper@gmail.com

PROFESSIONAL SUMMARY

Full-stack developer focused on building robust, scalable web systems using PHP, Node.js, PostgreSQL, JavaScript/TypeScript and Python. Hands-on experience developing complete applications, including interactive dashboards, management systems, API integrations and process automation.

Designs modern architectures, exploring approaches such as RAG (Retrieval-Augmented Generation) and intelligent agents integrated with databases. Follows development best practices, including code organization, version control and REST API design. Currently a Computer Engineering student with strong hands-on practice and continuous growth in full-stack development of distributed systems. Ambassador for Space Education at GGPEN-Angola and competitive programmer at AOCPC Angola.

HIGHLIGHTS

Ambassador for Space Education

GGPEN-Angola

Promoting and spreading space education and space sciences among students and the wider community.

Competitive Programmer

AOCPC Angola

Taking part in competitive programming contests, solving algorithmic problems under time limits.

TECHNICAL SKILLS

Languages	PHP, JavaScript, TypeScript, Python, HTML, CSS, Java, C#, C++, R, C.
Backend	Node.js (Express), REST APIs, task automation with Cron.
Frontend	React.js, Bootstrap, responsive interfaces
Databases	PostgreSQL, MySQL, data modeling, optimization, advanced queries (JOINs, filters, aggregations).
AI & Automation	RAG (Retrieval-Augmented Generation), intelligent agents, LLM integration, no-code / low-code.
DevOps & Cloud	Git, GitHub, deployment on Render and Vercel, environment variables
Computer Networks	OSI and TCP/IP models, IP addressing and subnetting, routing and switching, VLANs, network services (DNS, DHCP, NAT), network configuration and troubleshooting, network security fundamentals.

EXPERIENCE AND MAIN ACTIVITIES

Full-Stack Software Development

- Development of complete web systems with PHP, Node.js (Express) and PostgreSQL/MySQL.
- Building and consuming REST APIs.
- Implementation of dashboards with data visualization (charts and reports).
- Development of responsive interfaces with HTML, CSS, Bootstrap and React.js.
- System integration with file uploads and validations.

Systems Architecture and Backend

- Application structuring based on best practices (modular organization and separation of concerns).

- Modeling and optimization of relational databases (PostgreSQL, MySQL).
- Task automation with Node.js + Cron.
- Integration of RAG-based solutions for data interaction.
- Writing advanced queries (JOINs, filters, aggregations).

DevOps

- Use of Git and GitHub for version control and collaboration.
- Branch management, organized commits and change history.
- Deployment of web applications on platforms such as Render and Vercel.
- Configuration of runtime environments and environment variables.
- Application of best practices: code organization, reuse and maintainability.

Computer Networks

- Configuration of local area networks (LAN): IP addressing, subnetting and VLANs.
- Configuration of routing, switching and network services (DNS, DHCP, NAT).
- Connectivity troubleshooting; network security fundamentals.

Initiatives and Technical Collaboration

- Founding and organizing a developer community in Uíge province.
- Participation in academic projects focused on real-world solutions.
- Continuous learning and exploration of new technologies.

OTHER PROFESSIONAL ACTIVITIES

Freelance Development

- On-demand development of web and desktop systems.
- Implementation of backend features and database integration.
- Application customization and technical problem solving.

Exploring Emerging Technologies

- Study and implementation of intelligent agents using no-code and low-code approaches.
- Experimentation with LLM integration and task automation.
- Application of RAG concepts in data-driven systems.

Hands-On Projects

- Design and implementation of academic and personal solutions focused on real-world problems.
- Building complete systems with backend, database and user interface.
- Application of development best practices and code organization.

EDUCATION

Computer Engineering (3rd year) In progress

Polytechnic Institute of Kimpa Vita University

Training focused on software development, databases, computer networks and systems engineering. Active participation in hands-on projects applying knowledge to real contexts, with continuous growth in backend, frontend and database technologies.

Mid-Level Technician in Physical and Biological Sciences 2019 – 2022

São Francisco de Assis School Complex (Negage)

Foundation in analytical skills, problem solving, communication and knowledge structuring.

Mentoring and Academic Paper Review

- Participation in knowledge-sharing initiatives among peers and support on collaborative academic projects.

- Active interest in contributing to tech communities and to the development of fellow students.

ADDITIONAL TRAINING

- Applied Computing for Users course – **José Inácio Training Center (Negage)**
- Practical Web Application Development Course — **AP Developers**
- HTML and CSS Course: website creation, development environment, tag and file structure – **Alura Brasil.**
- Back-End Immersion — **Alura Brasil**
- Front-End Immersion — **Alura Brasil**
- Artificial Intelligence Immersion — **Alura Brasil**
- Full-Stack Web Training
- Public Speaking and Assertive Communication Course – **Catholic University of Angola** (**UCAN**)

Topics covered: backend development (Node.js, REST APIs), integration of agents into web applications, web application structuring, database integration and development best practices.
